

Our company located in "Yamato", it means ancient Japanese capital of Japan. This company established more than 1300 years ago, as a one of the founders of casting business in Japan with official casting license from government at that era. we operate foundry manufacturing industry for generations. Initial stage, we manufacture lanterns, bells for temples and shrines, pots, and agriculture equipment, and during the war we have been engaged in the manufacture of munitions.

After the war, in Showa era from 1948 to 1952, the production was converted into machine tools and spinning machine parts. In April 1962, GOIDOU INDUSTRY Co., Ltd. was established.

Since then, we are manufacturing mainly for marine and land use internal combustion engines and industrial machine parts. Currently, we have established a furan process line and in operation. Also, at the present, not only casting production but also machining and sub-assembly are consistently carried out.

We aim to stabilize high quality of technical management and production. With the company policy, "spirit of service", we try to satisfy every customers. We strive to modernize and enhance our facility for improvement of production technology and quality services.

Superior products produced with
enough experience and high technology

GOIDOU INDUSTRY Co., Ltd.

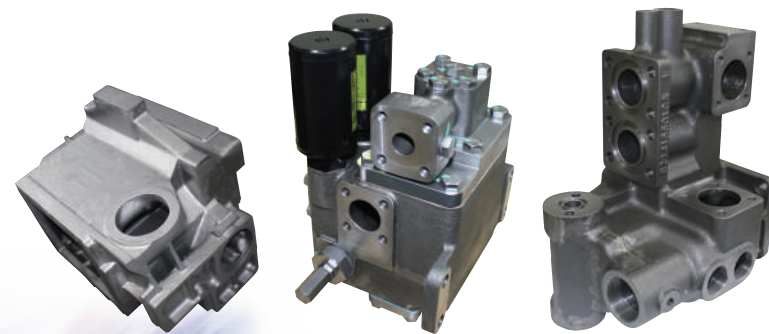

Company Profile

Business Item

- **Gray Cast Iron** FC200~FC350
- **Ductile Cast Iron** FCD400~FCD600
- **Plate Works**
- **Machining**
- **Subassembly**

Application / Use
 Engine parts
 Marine & land's use strainer parts
 Construction Machine parts
 Mother Machine parts

Quality Control

Our Company, concerning on casting technology have always adapted the best technology while accumulating know-how at the production site for many years.

Furthermore, we perform consistent quality control from casting to processing, assembling and in every manufacturing process it is reliably carried out. We are establishing a system that does not produce defects and we want to ensure satisfactory performance and quality that can meet the customers' expectations. We believe that "quality" that can satisfy highly increasing numbers of customers' demands not only the hard work but also comprehensive in the appointed day of delivery, price, and including the follow-up after delivery of goods.

To provide "quality", not only production technology but also flexible and efficient production line, system and management. Moreover, the construction of an information system such as accumulation of various data is indispensable.

Our mission as manufacturer, we will respond with a comprehensive quality control system on how to embody the customers' desired ideals.

Subcontractor machining · plate work

Company Name:
Nissin Tech Co., Ltd.

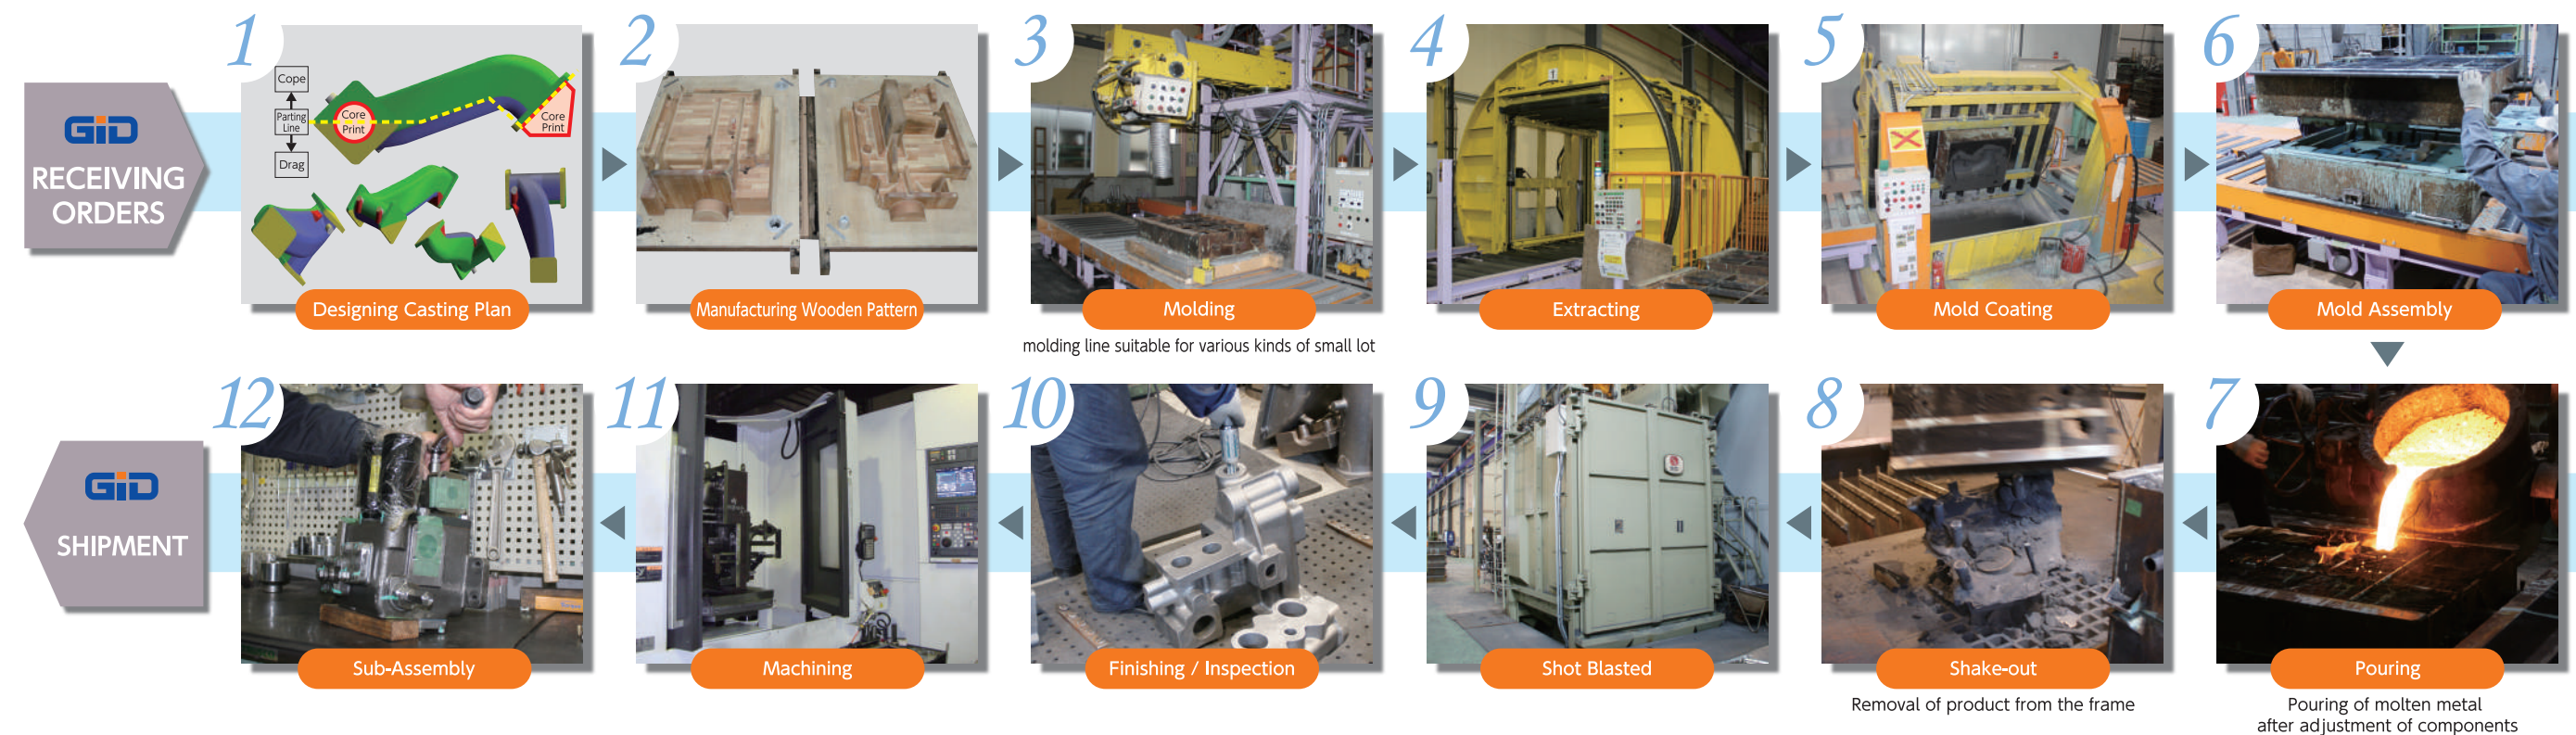

Location:
Osaka Prefecture Higashi Osaka City, Japan

Business:
 • metal plate parts and machining
 • Diesel engine parts
 • design production related to jig equipment

Production Process

Our Plant has installed high technology and ecology facility. These facilities make us enable to challenge to produce various types of small quantities products which is the difficult for casting metal usually. Our plant also has fully automated mold extracting machine and planning for 2nd term construction for fully automated storage system of wooden pattern, we aim to be a casting company that can respond to a reasonable cost and fast delivery.

In addition, we established a consistence quality control system by incorporating high technology and enabling traceability of casting products. We are always striving to meet all the needs of customers.

Overseas Supply

Our company accumulated casting information in China. It started when the company accepted Chinese trainees more than 15 years ago. Then, we provide our technology to the partner companies in China. Guiding them with the Japanese management method. As a result, the partner company improved their production quality.

From now on, International competition is more active. We would like to propose new option for your procurement of casting iron products.

According to this partnership, we can import their product on behalf of you. We also provide after support about products quality and stability of supply.

- Production supported with Japanese technology and quality control.
- Application of quality control system of Japan from stocking of materials to casting, finishing, inspecting and shipping.
- Technical Staff of GOIDOU INDUSTRY continuously visit Chinese Partner factory to provide guidance for production control.
- Actions regarding quality improvement, the company promptly instruct to China through digital camera, e-mail and video conference.

Stable Supply
 Preparing various option to prevent the risk in the oversea business. We have absolute counter measure to ensure stable supplies such as wooden pattern storage at the company.
