Akioka Co., Ltd.

# Taking A New Leap With New Challenges

I would like to take this opportunity to express my gratitude to our customers for their continuous feedback and support.

We started our operation as a casting specialist manufacturer in 1966. With our main expertise in construction machinery, we have developed our business by responding to diverse needs of various industries, such as high-mix low-volume production of many products of various sizes.

We strive to always put our best foot forward and push ourselves in a challenge to master the next technological skill and quality level.

All our staff is committed to “taking a new leap with new challenges,” aiming to become a manufacturer who can actively offer our ideas in product development rather than settling for the conventional supply model of manufacturing to order.

CEO

**Yoshinori Akioka**

## Our Products

## Overseas Network

### Stable Cost and Wide Range of Selection

Our global network allows us to better meet our customer needs. When we can procure products overseas as a cost-effective alternative without any compromise in quality, we will propose overseas procurement. Since 1995, we have created tie-ups with our Asian partners in China (Shenyang, Qingdao, and Dalian) and Korea (Busan), delivering lower-cost, higher-quality products that always delight our customers. As a casting specialist manufacturer, we are confident in our ability to select high-quality products from overseas! We also offer an excellent back-up system from our own factory!!

### Overseas Procurement Division

- We provide a stable supply of products with the same quality as our own
- We secure various methods and materials that cannot be produced in our own factory
- We select methods and factories that suit the product shape
- We select factories that suit customer needs in terms of cost and quality
- We assist customers' overseas factories in local production for local consumption

## \*CSR Policy

### Continuing to walk forward, while leaving footprints of happiness

Through our business activities based on Akioka's business philosophy, we strive to maintain a sincere dialogue creating mutual benefit for all of our stakeholders, and as a company that is trusted and needed by society, we look to create a sustainable society where people, community and the global environment coexist in harmony.

## \*CSR Promotion Items

- We provide safe and high-quality products and services stably at reasonable prices based on our quality policy.
- We maintain free and fair transactions and aim for coexistence and prosperity based on mutual trust with our business partners.
- We handle personal information provided by our customers with the utmost care, and manage it properly based on our personal information protection policy.
- We make every effort to maintain and improve a healthy, fair work environment, and promote workplace safety and health activities.
- We comply with labor-related laws, provide equal employment opportunity, respect employees' human rights, and create a workplace free of discrimination.
- We promote reduction in environmental load based on our environmental policy, and make every effort to protect the environment and preserve biodiversity in order to coexist with a sustainable global environment.
- We comply with laws and regulations of each country, respect diversity of history, culture and custom regardless of race, nationality, gender and age, and develop human resources and business activities that are rich in creativity and imagination.
- We engage in open and active dialogue with local communities, and promote social contribution activities, with the aim of creating an affluent society.
- We prohibit relationships with antisocial forces, take all legal measures against unreasonable demands from them, and confront them with a firm attitude.

## \*Environmental Protection Policy

Environmental problems, whose impact and damage continue to spread on a global-scale, are critical issues related to humanity's future survival beyond the next generation. We believe that it is our obligation to pass down the earth's irreplaceable resources for future generations. Therefore, we actively engage in global environmental preservation activities to fulfill our obligation, while promoting corporate activities that take into consideration harmony between economic activities and global environmental preservation.

We at Akioka supply castings used for vehicles and transportation machinery and hydraulic machinery. Through all our business activities, we conduct environmental management activities based on the following environmental policy, in an effort to permanently protect the global environment.

## \*Environmental Policy

(1) We promote an environmental management system in compliance with ISO14001 and promote environmental management activities by all employees.

(2) We comply with environment-related laws and regulations, ordinances and other requirements that we agree to.

(3) We grasp all environmental effects related to our business activities, products and services, establish environmental goals and objectives, and properly evaluate changes in business activities and the social environment as well as effects on stakeholders. We review our environmental management system on a regular basis, and continue to improve it. We work on the following issues with particular priority placed on:

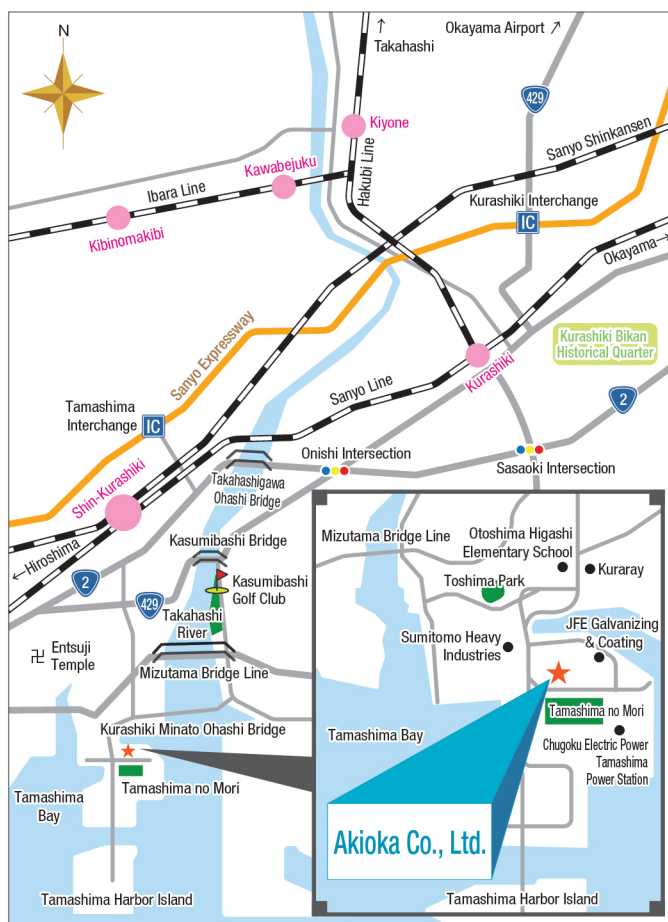

[1] Thorough sorting of waste

[2] Electric power saving

[3] Effective use of resources by reduction in materials

(4) In promoting our environmental management activities, we document and clarify our policies, plans and activity progress, and maintain accurate recordkeeping.

(5) We keep all employees and people who work for our company informed of this environmental policy through education and posting of notices, and at the same time, we disclose our environmental policy to the public through our website and brochures.

Our Business

We meet the diverse needs of our customers, from production of casting materials to procurement, processing and assembly.

We continue to challenge ourselves to manufacture all kinds of products using our production lines that can flexibly respond to mass production and small lot production of many kinds of products.

In addition, we strive to supply exceptional products, and also aim to offer least total cost to customers by application of Value Analysis and Value Engineering methods in design and development stages.

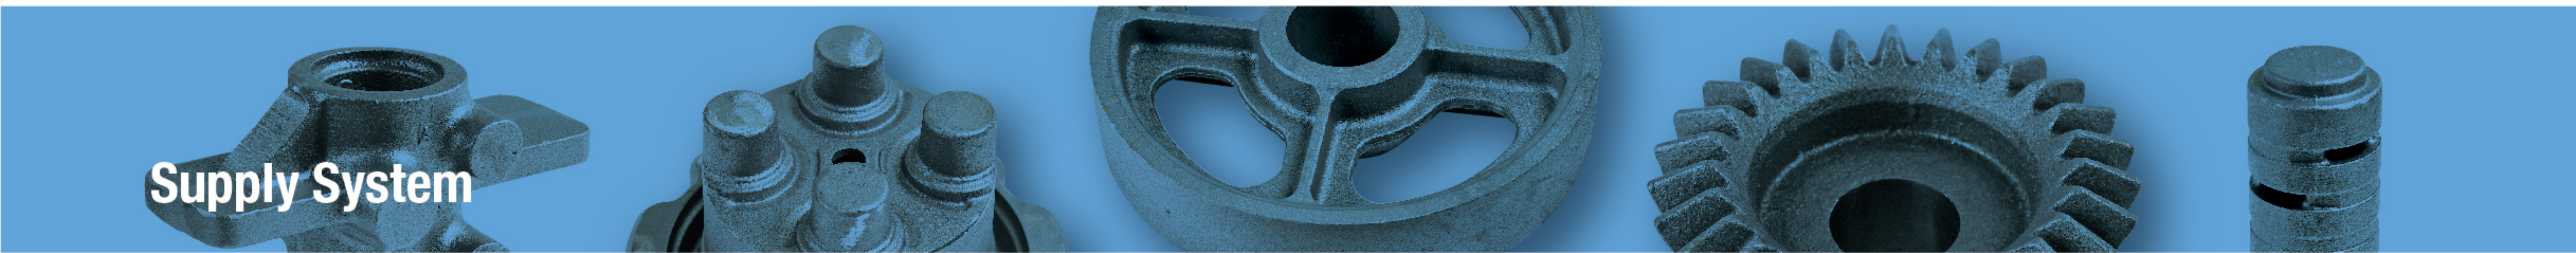

Since 1995, we have created tie-ups with our Asian partners in China and Korea, delivering products that suit customers’ needs.

Casting

Testing

Supply System

Our supply system employs various casting methods

Our products are widely used by leading brands around the world

With our extensive experience in construction machinery, we also handle components for automobiles and other industrial machinery.

We accept a wide range of orders, from production in our own factory to procurement from overseas.

We also respond to high-mix low-volume production of many products of various sizes to meet the various needs of our customers.
